

Termguard Invited to Professor Lee Chow Yang's Inaugural Professorial Lecture

Termguard Asia has been invited to attend Professor Lee Chow Yang's Inaugural Professorial Lecture held at Universiti Sains Malaysia, Penang on 3 September 2007. The talk was attended by over 400 guests from Malaysia, Singapore, Thailand and Japan.

Prof Lee is the pioneer in the field of urban entomology in Malaysia with research interests focusing in termites, cockroaches and ants. As of June 2007, he has published 92 international (70%) and regional (30%) referred papers, 7 books, 34 book chapters and articles in proceedings and trade magazines and more than 110 abstracts. Between 1997 and 2007, he has supervised 12 graduate students (1 Ph.D. and 11 M.Sc.) and more than 50 final year students. He has also delivered more than 80 talks as keynote, plenary and symposium speaker at a number of international conferences and seminars.

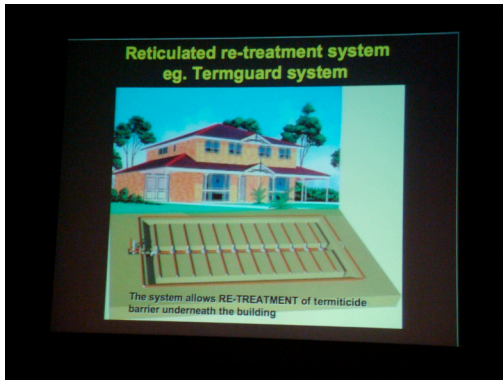

In his lecture entitled "Perspective in Termite Management in Buildings and Structures in Malaysia", Professor Dr. Lee has provided a great insight into the current status of termite management in Malaysia. He had also highlighted Termguard System as one of the latest technology in Termite Management in Malaysia. Termguard is proud to be associated with Prof Lee and look forward to working with him in our continuous effort in the research and development of Termguard System in Asia.
